EDUCATION

Chennai Institute of Technology <i>Bachelor of Technology in Computer Science and Business Systems [CGPA - 8.68]</i>	Chennai, India November 2023 – November 2027
--	---

INTERSHIP

Web Development Intern <i>Altruisty</i> • Developed and deployed the official company website using the MERN stack (MongoDB, Express, React, Node.js).	June 2024 – July 2024 Chennai, India
Research Intern <i>Chennai Institute of Technology</i> Worked on 2 IEEE-level papers on AI, IoT, and BCI integration & AI in Health Surveillance • Paper 1: The Convergence of Artificial Intelligence, Internet of Things, and Brain-Computer Interfaces: Innovations, Applications, and Challenges. • Paper 2: The Intelligent Public Health Surveillance System: A Cutting-Edge Approach to Monitoring and Predicting Public Health Threats.	Nov 2024 - Dec 2024 Chennai, India
AI Intern <i>Centre of Excellence for Artificial Intelligence, Chennai Institute of Technology</i> • Completed a 50-day AI internship focused on Python, ML, GenAI and Agentic AI, solving real-world problems through hands-on projects.	May 2025– June 2025 Chennai, India

PROJECTS

Mess Management App <i>Flutter, Machine Learning, Chatbot, Firebase</i> • Developed a system to streamline communication between mess admins and students. • Enabled students to check daily menus and select meal portions, helping mess admins cook precise quantities to reduce food wastage, aligning with UN SDG goals.	
Bodhi Book Donation App <i>Flutter, Firebase, Chatbot, Firestore</i> • Built a Flutter-based book donation app with genre-based discovery and chatbot-powered community engagement.	
Healix Medical Application <i>Flutter, Node.js, Django, MongoDB, Firebase</i> • Created a telemedicine app with doctor consultations, appointment booking, and blockchain-secured medical record management.	
Agrivoice (AI & IoT) <i>Python, ESP32, NPK Sensors, Machine Learning, Google Speech-to-Text, Firebase</i> • Built a multilingual AI assistant to monitor real-time soil pH and NPK data via sensors • Voice commands enabled rural farmers to access environmental data, improving yield planning	
Finding Missing Person App (SIH 1790) <i>Face Recognition Model, React.js, Python, WhatsApp API</i> • Designed a system to identify missing persons and criminals using AI-powered facial recognition • To detect registered faces in real-time and notify the concerned authorities through WhatsApp API.	
RedBus Demand Prediction Model <i>Python, Scikit-learn, XGBoost, Pandas, Matplotlib, Seaborn</i> • Built a machine learning model to forecast seat demand for RedBus based on historical data such as route, time, seasonality, and pricing. • Trained 1 million datasets, improved route-wise seat allocation planning using regression models, achieving up to 85% accuracy.	
Sanskriti Sangam <i>Streamlit, Python, Snowflake, Gemini AI</i> • Developed an AI-driven cultural tourism platform with voice-enabled access and hyperlocal itinerary generation using Streamlit and Gemini. • Leveraged Snowflake to create India’s first Heritage Data Lake, empowering rural operators and boosting cultural visibility across all states.	

CERTIFICATIONS

• AWS Cloud Practitioner • AWS Cloud Foundations • Amazon Future Engineer – 10-Month Java & DSA Course • Cloud computing (NPTEL)	• Parallel Computer Architecture (NPTEL) • Algorithms on Graphs, Strings, and DSA – Coursera • Introduction to cybersecurity (CISCO) • Cybersecurity Essential (CISCO)
---	---

TECHNICAL SKILLS

Languages: Java, Python, C,C++ Full-Stack Development: HTML, CSS, JavaScript, Node.js, Express.js, React.js, Next.js Database & Cloud Technologies: SQL, MongoDB, PostgreSQL, Firebase, AWS, Snowflake Mobile App Development: React Native, Flutter Design & Prototyping: Figma, Adobe Photoshop Python Libraries & Frameworks: Pandas, Pytorch	Development & Productivity Tools: PgAdmin, MS word, Excel, Powerpoint Version Control: Git, GitHub LLM/AI Frameworks: LLaMA 2, LangChain, NLTK, SpaCy, OpenCV, Google Speech-to-Text, Face Recognition, OpenAI, Model Context Protocol(MCP)
---	--

ACHIEVEMENTS

Selected as an Amazon Future Engineer (AFE) - FFE Scholar at Amazon . Selected among the top 0.6% (25 out of 4000+ teams) in K! Hacks , South India’s largest tech hackathon, organized by Anna University Inter-Department Project Expo (Hardware) Winner: Recognized for outstanding innovation and execution. Presented paper at IEEE [ICDSBS] on Public Health Surveillance using AI. Solved 700+ problems and achieved Knight batch in Leetcode Finalist: NAF Uzhavu Hackathon at IIT Madras
